César Andrés Lizárraga

Senior/Staff Infrastructure Engineer | Software Architect
St. Louis, MO | calizarr@gmail.com
github: http://github.com/calizarr
LinkedIn: http://linkedin.com/in/calizarr

Professional Summary

Strategic and hands-on **Senior Infrastructure Engineer** with over 15 years of experience in cloud-native architecture, Kubernetes orchestration, and large-scale software development. Proven expertise in leading cross-functional teams to deliver high-availability systems, including architecting platforms that secured multimillion-dollar contracts. Adept at bridging the gap between low-level hardware (IoT/Embedded) and high-level cloud infrastructure to drive innovation and operational excellence.

Technical Skills

- **Infrastructure & DevOps:** Kubernetes (K8s), ArgoCD, Argo Workflows, OpenTofu/Terraform, Ansible, Cilium eBPF, Talos Linux, Proxmox, Bare-metal.
- **Languages & Frameworks:** Golang (Learned on the job), Python (**Django, FastAPI**), **Scala** (Learned on the job), BASH, SQL, Java.
- **Cloud Platforms:** AWS (EC2, S3, DynamoDB, IAM, Route53, GuardDuty, WAF), DigitalOcean.
- **Databases & Data Platforms:** PostgreSQL, AWS RDS, SQLite, DynamoDB, Ray, MLFlow.
- **Observability & Reliability:** Prometheus, Grafana, Linkerd, ELK Stack, Incident Response, Post-mortem Leadership, PiHole/Unbound.
- **Security & Compliance:** AWS WAF, AWS GuardDuty, SSL/TLS Encryption-in-transit, **OSS Review Toolkit (ORT)**, SOC2 Compliance, Dependency Vulnerability Remediation.
- **Hardware & IoT:** Raspberry Pi (4b, Pico 2W), Arduino, Logic Analyzers, I2C/SPI/UART troubleshooting, field canopy sensors, SMD harvesting/organization
- **Developer Tools:** Git, Tekton, Jenkins, Travis CI, GNU Emacs, IntelliJ IDEA.

Relevant Experience

CIBO Technologies | St. Louis, MO

Senior Software Engineer (Infrastructure) | *March 2021 – October 31, 2025*

- **Architected and standardized core infrastructure** for API-driven microservices backed by **PostgreSQL**, increasing platform reliability, reducing disaster recovery RTO through high-availability guardrails, and optimizing developer self-service.
- **Developed custom Kubernetes Admission Webhooks** in Golang to automate complex lifecycle operations, **reducing manual configuration errors by approximately 75%**.
- **Led SOC2 Compliance and AWS Architecture reviews**, ensuring enterprise-grade security and hardening the security posture of public-facing domains.
- **Orchestrated full-stack vulnerability remediation** using the OSS Review Toolkit (ORT), navigating complex dependency trees in Scala and TypeScript to resolve critical security flaws while implementing "fuzzy pinning" strategies to prevent future regressions.
- **Scaled R&D capabilities** by deploying Ray and MLFlow clusters, **approximately accelerating model training times by 30% and deployment times by 50%** for the Data Science and Computer Vision teams as well as reducing our budget by eliminating unused, existing EC2 instances with GPUs.

- **Contributed to upstream open-source projects** to resolve critical bugs, **eliminating the long-term maintenance overhead** of internal private forks.

Interim Lead of Infrastructure | *April 2020 – March 2021*

- **Directed strategic roadmap development** for a growing 4-person infrastructure team, **aligning technical debt reduction with 12-month business milestones**.
- **Managed cross-departmental security coordination** and mentored junior engineers, **improving team velocity by approximately 50%** during a critical leadership transition.

Engagement Engineering Lead (Project Lead) | *July 2017 – April 2020*

- **Architected a custom distributed application suite** that secured a multimillion-dollar partnership, utilizing **PostgreSQL** for complex **data modeling and schema design**.
- **Optimized client research workflows by eliminating structural bottlenecks** using high-level product and architectural design, **reducing scientist workflow time from months to days and data processing time from weeks to hours**.
- **Engineered scalable microservices** in Scala and Python, **successfully supporting 100+ concurrent users running c omputational and data intensive workflows** from prototype through global deployment.

Nanaya | **St. Louis, MO**

Co-founder / Infrastructure & Software Engineer | *July 2014 – Present*

- **Managed technical operations** for a global platform with 300,000+ users, **ensuring 99.9% uptime** through proactive **PostgreSQL query optimization** while facilitating communication between developers and R&D teams.
- **Migrated legacy infrastructure to a container-based model**, which **reduced deployment overhead by 50%** and significantly improved developer iteration speed.
- **Refined production-level algorithms** and data pipelines, **improving algorithm speed by 60% and accuracy by 20%** for the core application.

Donald Danforth Plant Science Center | **St. Louis, MO**

Senior Computational Scientist | *December 2014 – July 2017*

- **Developed and commercialized PheNode**, a field canopy sensor system (Arduino/Raspberry Pi) utilizing distributed Linux systems for automated data collection.
- **Automated high-throughput image capture** across 180 Raspberry Pis using Ansible, creating dense 3D reconstructions with **sub-centimeter accuracy** $(+/-0.5cm)$.
- **Coordinated data analytics** for global research labs, **optimizing computational resource allocation** for high-throughput sequencing and imaging pipelines.

Technical Projects

Alvoiarko Homelab (Advanced K8s & Networking)

- Maintains a **4-node bare-metal Kubernetes cluster** (Talos/Proxmox) to **test production-grade deployments** using Cilium eBPF and OpenTofu.
- Operates critical services like **Reconya** and **ConvertX**, utilizing a full CI/CD lifecycle via ArgoCD and Tekton.

PhenoPiSight (IoT/Computer Vision)

- Developed a distributed greenhouse phenotyping platform that **streamlined the image transfer and 3D reconstruction pipeline** for high-throughput analysis.

Education & Languages

- **B.A. Mathematics (Probability and Statistics)** | Washington University in St. Louis
- **Languages:** English (Fluent), Spanish (Fluent), Italian (Intermediate).
